Growing together

Bayer CropScience is a reliable partner when it comes to optimizing the production and marketing of the vegetables grown from our genetics. With innovative products and concepts we create value at all levels of the vegetable supply chain – from growers to consumers. The close relationships with our customers and partners and our specialized crop teams form the basis of our success. Together, we improve people's quality of life with healthy, convenient and flavourful vegetable varieties.

locations worldwide

nunhems[®]

With the input from our dedicated team of leek specialists and from leek growers worldwide, Bayer CropScience Vegetable Seeds constantly strives to optimize the leek assortment in line with the development of the market needs. We offer healthy, high yielding varieties in every market segment, which enables you to deliver a high quality product all year round. Our specialized sales team is locally present in all major leek growing areas to support you developing a growing plan, which ensures that you get the most out of our assortment. From Nunhems' leek varieties you can expect more, because our genetics and services provides added value through the entire chain. We are "Growing Together in Leek Business".

The best start to your season

Krypton F1

Be the first on the market and increase your revenue with this strong and durable hybrid that handles well during harvesting.

Duraton F1

Serve a broader market with this long hybrid that is strong against bolting.

Megaton F1

The high yielding hybrid that combines earliness with a long harvesting window thanks to its low risk against bolting.

The secure next step for your season

Belton F1

Increase your revenue with this long shafted hybrid that produces uniform and easy to clean leek.

Poulton F1

Generate the highest possible earnings with this short shafted hybrid that produces high quality leek due to its high density and attractive dark color.

The solution to complete your season

Pluston F1*

Maximize your profit this winter with a long winter hybrid that is high yielding and easy to clean.

Aylton F1*

Get safely through the coldest period of the year by choosing a short winter hybrid that offers greater protection against diseases.

Vitaton F1

Minimize risk with the hybrid that has shown a strong resistance against *Pseudomonas syringae*.

The unique assortment for pre-pack, bunching and slicing

Linkton F1* **NEW**

This early hybrid gives you the length and uniformity needed for pre-pack already from the beginning of the season.

Longton F1

Offers unique uniformity and cleaning ability during the Autumn.

Lexton F1

The late hybrid that provides you the ability to prolong your leek supply in the season.
